

Mix B Fertilizer

- Dry bag 25kg mix for ease of transport and storage
- Commercial grade ingredients
- Commercially proven results

Can-Hub supplies the professional cannabis industry, our branches and specialists span the globe. The Can-Hub specialists draw on over 135 years of experience raising both yields and quality in all kinds of crops. In conjunction with our partners, we invest in innovation and develop cultivation methods using the latest cannabis technology.

Can-Hub Essentials Veg Mix B and Bloom Mix B Fertilizers are a dry mix recipe. It's designed to provide commercial cannabis cultivators with an efficient, no fuss and professional grade solution for cannabis / hemp cultivation, from propagation to harvest.

The clever system is designed to utilize any commercial grade Calcium Nitrate*, as the a tank ingredient, and combine all of the remaining macro and micro elements into the Essentials Mix B Fertilizer.

Can-Hub Essentials Mix B Fertilizer uses the latest spec chelated Copper, Manganese, Zinc and Iron, alongside 99% pure hydroponic grade ingredients, to deliver a consistent mix every time.

Our recipes draw on over 20 years of experience in cannabis nutrient production. It has been designed together with leading commercial cultivators, to hit all target nutrient levels and deliver maximum results in terms of yield, cannabinoid and terpene profiles.

*Calcium Nitrate recommendation for a tank is 15,5%N and 19% Ca hydroponic grade.
